

# KETTERING UNIVERSITY ONLINE

---

The 2018-2019 Academic Year continues to celebrate the growth of Online programs through Kettering University Online (<https://online.kettering.edu/?schoolsrc=42786>) (KUO). These courses are offered along with our high quality campus-based graduate programs. All of the Distance Learning programs have transitioned to the Kettering University Online platform.

The Kettering University Online platform places an emphasis on enhanced student interactions, including a professional advisor for support throughout the program. The format for each course has been redesigned to promote more interactivity between students in the classes, as well as live office hours each week with a professor to ensure comprehensive learning. KUO courses are taught in accelerated sessions (six and eight week courses). This model allows adult students to move more efficiently through their Graduate programs employing a "learn today-use tomorrow" philosophy that provides practical application of knowledge to the real world. Please note the Master of Science in Engineering are taught in both eleven and six week courses.

Currently, Kettering University Online offers the Master of Science in Lean Manufacturing (<https://online.kettering.edu/programs/masters/lean-manufacturing-masters-online/?schoolsrc=42786>) (MSLM) program, the Master of Science in Engineering Management (<https://online.kettering.edu/programs/masters/engineering-management-masters-online?schoolsrc=42786>) (MSEM) the Master of Science in Operations Management (<https://online.kettering.edu/programs/masters/operations-management-masters-degree-online/?schoolsrc=42786>) (MSOM), the Master of Science in Supply Chain Management (<https://online.kettering.edu/programs/masters/masters-supply-chain-management-online/?schoolsrc=42786>) (MSSCM) , Master of Business Administration (<https://online.kettering.edu/programs/masters/masters-business-administration-online/?schoolsrc=42786>) (MBA) and Master of Science in Engineering (MSE) (concentration in electrical and computer engineering). This MSE program has an autonomous focus and provides a cutting edge into the future of mobility.

Kettering University continues to meet the needs of our students through a range of options that not only employ best practices but continue to offer quality, rigorous programs that align with our reputation as a one of the best Engineering and Business schools in the country.

Thank you for your interest and participation in graduate education at Kettering University.
