

# KETTERING UNIVERSITY ONLINE

---

The 2021-2022 Academic Year began the next century for Kettering University and continued growth for Kettering University Online (KUO). All seven programs are offered 100% online and have the same quality and rigor as on-campus programs.

The Kettering University Online platform places an emphasis on enhanced student interactions, including a professional advisor for support throughout the program. The format for each course has been redesigned to promote more interactivity between students in the classes, as well as live office hours each week with a professor to ensure comprehensive learning. KUO courses are taught in primarily accelerated sessions (seven and nine week courses) as well as twelve week courses offered in the MSE ECE- Advance Mobility program and some MS Data Science courses. These models allow adult students to move more efficiently through their Graduate programs employing a "*Learn Today-Use Tomorrow*" philosophy that provides practical application of knowledge to the real world. Please note the MSE (ECE) and MS Applied Data Science and Data Analytics programs are taught in both twelve and seven week courses.

Currently, Kettering University Online offers the Master of Science Lean Manufacturing (MSLM), the Master of Science Engineering Management (MSEM), the Master of Science Operations Management (MSOM), the Master of Science Supply Chain Management (MSSCM), Master of Business Administration (MBA), and Master of Science Engineering (Concentration in Electrical and Computer Engineering-Advanced Mobility), Master of Science Applied Data Science and Data Analytics as well as seven certificates.
