Graduate Programs That Set You Apart

Kettering University’s graduate programs position you at the forefront of innovation and leadership. Immerse yourself in emerging fields, such as artificial intelligence and technology leadership, supported by enriching industry connections.

Our curriculum is shaped by a network of over 400 Co-op employer partners across 21 states and Germany, with input from industry boards composed of top experts. This collaboration ensures the curriculum remains relevant and directly applicable to the most current market needs.

Choose from advanced degrees in engineering, sciences, and business. Each program is designed to challenge you and encourage growth and personal development while advancing professional trajectories.

Kettering’s Graduate School is recognized for its innovation and the tangible return on investment it offers through high-quality instruction that prepares you to tackle contemporary challenges and devise future solutions effectively.

Choose from on-campus graduate programs in:

- **Engineering:**
  - Artificial Intelligence
  - Autonomous Vehicles
